PROFILE

Computer Science and Engineering student with hands-on experience building full-stack web applications, cross-platform desktop software, and AI-powered solutions. Experienced with Go, Python, TypeScript, React, and modern backend technologies, with a strong interest in software engineering, machine learning, and building practical solutions to real-world problems.

EDUCATION

- American International University - Bangladesh**
Bachelor of Computer Science & Engineering; CGPA: 3.83
Courses: Operating Systems, Object Oriented Programming, Data Structures, Artificial Intelligence, Machine Learning, Networking, Databases

Dhaka, Bangladesh
January 2023 - Present
- SCHOLARSHOME**
Higher School Certificate (HSC); GPA: 5.00

Sylhet, Bangladesh
January 2019 - 2021

SKILLS SUMMARY

- Languages:** Go, TypeScript, JavaScript, Python, C++, Java, Rust, C#, SQL, Bash, Zsh, Powershell
- Frameworks:** React, Next.js, Vite, Tailwind CSS, shadcn/ui, Wails, FastAPI, ASP.NET Core, Django
- Libraries:** TanStack Query, Zustand, Entity Framework Core, SQLC, Sentence Transformers
- Databases:** PostgreSQL, MySQL, SQLite
- Tools:** Git, GitHub Actions, Docker, CMake, Neovim, pnpm, Bun
- Platforms:** Linux, Windows, macOS

PROJECTS

- RecruitBD-AI - an AI-powered CV parsing and job matching platform:** The application uses a FastAPI backend with LLM integration for extracting structured data from CVs (PDF/DOCX) and matching them against a pre-indexed job database using SentenceTransformers.
Tech: Python, NodeJS, React, Vite, Tailwind CSS, shadcn/ui, FastAPI, Uvicorn, Ollama/LLM, Sentence Transformers, NumPy, pdfplumber, python-docx, pnpm
- Hospital Appointment System - a web-based hospital appointment management system:** The application follows a layered architecture with an ASP.NET Core MVC web application for managing patients, doctors, appointments, and hospital operations, backed by Entity Framework Core and SQL Server.
Tech: C#, .NET 10, ASP.NET Core MVC, Entity Framework Core, SQL Server, AutoMapper, BCrypt, Docker
- AIUB Companion - a cross-platform desktop application for AIUB students:** The application provides offline access to university notices, class routines, and academic calendars, with background synchronization, fuzzy search, desktop notifications, and automatic updates. Built with Wails using a Go backend and React frontend, with SQLite for local persistence and Excel parsing for course routines.
Tech: Go, Wails v3, React 19, TypeScript, Vite, Tailwind CSS, shadcn/ui, SQLite, SQLC, TanStack Query, Zustand, excelize
- Sahara - an e-commerce platform for browsing, purchasing, and managing products:** The application provides a PHP-based online shopping platform with user authentication, product browsing, shopping cart and checkout functionality, order management, and seller/admin interfaces backed by a relational database.
Tech: PHP, MySQL, HTML, CSS, JavaScript

LANGUAGE

- English - Fluent in speaking and writing
- Bengali - Native speaker
